Subject: Crouse/Hinds

As we discussed, here is the documentation in support of the determination that Crouse/Hinds (OU21) is not a subsite and, therefore, the RI/FS will not be performed.

A hard copy of similar documentation for Maestri II (OU7) has been put into interoffice mail.

The dates have been entered into CERCLIS.

We will provide similar documentation related to Nimo-Erie Boulevard (OU14) once it can be located.

Re: Crouse-Hinds Site (North and South Landfills)

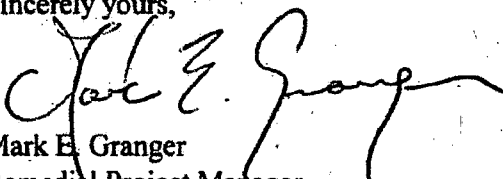

Dear Mr. Mustico:

The U.S. Environmental Protection Agency (EPA) has reviewed the New York State Department of Environmental Conservation's (NYSDEC's) draft "Onondaga Lake NPL Subsite Evaluation" form for the Crouse-Hinds Site (North and South Landfills) submitted in March 2007.

EPA concurs with NYSDEC's recommendation that the Crouse-Hinds Site (North and South Landfills) not be designated a subsite of the Onondaga Lake Superfund Site on EPA's National Priorities List. If new information comes to bear that would materially alter the assumptions upon which this recommendation is based, EPA would expect to obtain the opportunity to revisit this concurrence.

If you have any questions, please contact me at (212) 637-3351.

Sincerely yours,

  
Mark E. Granger  
Remedial Project Manager  
Central New York Remediation Section
